

Lowering Kit Accessories- Kawasaki

Scotworks has accessories for your Kawasaki rear suspension, and tools to ease installation of our lowering kits. Our rear shock spring compressor kit is a must for installing the rear shock preload kit. It comes in handy for any shock maintenance you may have to do. The rear shock preload kit is a great add on to any bike, by increasing the rear shock preload. The kit also includes shock snubbers to prevent bottoming out on rough terrain when using our lowering kits.

Rear Shock Spring Compressor Kit

Scotworks Rear Shock Spring Compressor Kit is a must when installing our rear shock preload kit. Every motorcyclists tool box should include one of these great tools! Kit includes the parts needed to safely compress your rear shock spring for any maintenance you might need to do. Instructions are also included in how to use this handy device.

Rear Shock Pre-load Improvement Kit

Scotworks Rear Shock preload improvement kit is designed to improve the load handling performance of your Vulcan 400, 800A, Classic, or 800 Drifter's rear suspension. This kit includes 2 pre-load inserts to effectively add 14 additional stiffness settings to your rear shock. Also includes 2 sets of snubber spacers which raises the mechanical stop of your shock to prevent your tire from scrubbing your fender when operating on rough terrain. Detailed installation instructions are also included.
